JULY 2018
TEMPSENS
TEMPSENS I ART 1 MASTHER

MCW PREDATOR'S

RATIONAL 2008
Business wealth in a high temperature range made it necessary to produce this unit. It is an excellent offer at a quite low price range.

Specifications

- Temperature range: 200°C to 800°C (392°F to 1472°F)
- Maximum rated temperature: 800°C (1472°F)
- Power supply: 400V 3 phase 50Hz/60Hz
- Tolerance: ±3°C (±5°F)
- Temperature Stability: ±5°C (±9°F)

HEAD-END THERMAL TURBINE (TRANSFORMERS BY VSM)

The VSM Head-End Turbine (VSM) is a high-temperature, high-pressure turbine designed to work in environments with high-temperature applications. It is used in the manufacturing of high-temperature applications, such as glass or ceramics.

Productivity Features

- Up to 1000°F for high-temperature applications
- DC motors
- Up to 1000°F for high-temperature applications

Specifications

- Operating temperature range: VSM: 200°C to 800°C (392°F to 1472°F)
- Pressure: 1500 psi
- Variable Turbine Speed: 150 rpm
- Loading Capacity: 500 hp
- Service Life: 10 years
- Stages: 3
- Duty: Continuous

CSR Activities

Training Programme on CPI and Management of common emergencies

Training on CPI and Management of common emergencies was conducted in January 2018. The training covered topics such as

Walk the Line—Marathon

The walk started at 6 AM from the Head Office and continued non-stop in the line. The weather was extremely hot, with temperatures reaching up to 30°C. Despite the heat, the participants completed the marathon successfully. The event was a great success and a great way to promote teamwork and collaboration.

Upcoming Exhibitions

Tempsens Instruments would love to hear your feedback about the seminars, workshops and conferences. We are always looking for ways to improve our services. If you have any suggestions, please share your ideas with us at:
